LUCK SPECIALTY PRODUCTS PREMIUM TOPSOIL

CERTIFIED

Developed in cooperation with the Department of Crop and Soil Environmental Sciences at Virginia Tech, Luck Specialty Products Premium Topsoil is the only topsoil that's registered and licensed with the Virginia Department of Agriculture and Consumer Services (VDACS) as a horticultural growing medium that complies with the Virginia Fertilizer Licensing and Registration law. Luck Specialty Products topsoil is tested monthly, so its analysis, texture and high permeability are consistent and accurate. Guaranteed.

CONSISTENT

When you specify topsoil for a large commercial or public project, the major supplier generally sub-contracts your order to several smaller suppliers. But texture, organic composition and mineral amendment can wildly vary from one topsoil supplier to the next. Which means your vision of a seamless, unified landscape may more closely resemble a patchwork quilt, dotted with bare spots, rivulets and uneven growth. No matter how large or small your order, you can count on Luck Specialty Products to deliver a consistent product, because it's always mined from the same natural bed in Greene County, Virginia. Shipment after shipment.

CLEAN

You're always assured of getting the results you planned for when you specify Luck Specialty Products. Because Luck Specialty Products Premium Topsoil offers a blend of only rich and loamy native soil, amended with organic minerals and plant-available nutrients. This blend provides just the right balance between the level of water retention plants need and the drainage necessary to promote healthy soil aeration. Since Luck Specialty Products Premium Topsoil is screened at 6mm you'll also find it free of pebbles, root clumps and oversized twigs.

THE 3 Cs OF RANKING TOPSOIL: DOES YOURS MEASURE UP?

All topsoil is not created equal. Like shopping for a diamond, it takes more than the naked eye to compare the real quality of the topsoil you purchase.

Rank the quality of any topsoil using the 3 Cs – certification, consistency and cleanliness – and you'll find that no other topsoil ranks higher than Luck Specialty Products Premium. What's more, Luck Specialty Products Premium Topsoil has a typical pH analysis of 6.5 and offers the moisture retention critical to the long-term success of newly seeded grounds. So whether you're landscaping an entire office park, a botanical garden, an athletic field or your own back yard, spare yourself any surprises.
